

Easy interpretability [Akuthota et al., 2023]

Easy implementation with decent performance [Khademi et al., 2023]

Usually ${f C}$ is calculated as the sample covariance matrix [Guo et al., 2020]

Ignores nonlinear interations [Ghanbar et al., 2021]

Not design for muti-class scenarios [Alizadeh et al., 2023]
